

SELECT NEW NUMBERS OR KEEP YOUR EXISTING ONE - THE CHOICE IS YOURS

Number management

My number management system allows you to be flexible with your inbound numbers.

Keep your current number or select new numbers from anywhere in the country, regardless of where your premises is located. My portal makes the process simple, easy and efficient.

Key benefits

- Keep your number**
 Save money on publicising new numbers. I can move your existing numbers to my system with absolutely no impact on your customers.
- Nationwide coverage**
 For some businesses, it is important to be seen to have a local presence. I can give you numbers from any area code in the UK.
- Geographically independent**
 If you don't want to appear to be linked to a certain area of the country, I can assign you a non-geographic number, for example; 0800 or 0330.
